## Our objectives

Gütegemeinschaft Abfall- und Wertstoffbehälter e.V. (GGAWB) is a registered association of responsible manufacturers of containers for waste and recycling materials who are committed to subjecting their "RAL" quality assured products as well as their components to stringent design testing and internal controls according to current technical and testing standards. Moreover, all of the products are also monitored before, during and after production, by independent bodies in order to ensure the highest and most consistent quality.

## Sustainability and conserving resources through RAL quality tested containers for waste and recycling

- High quality ensures safety and durability
- Flexible use of materials generates scope for eco-friendly conduct
- Durability of the waste and recycling container conserves resources and reduces harmful emissions
