

This is a detailed architectural elevation drawing of a three-story brick building. The structure features a steep, gabled roof covered in reddish-brown tiles. Two chimneys are visible on the roofline. The main facade is constructed of dark red bricks. On the left side, there is a section with a lower roofline, also tiled, which includes a small square window on the upper level and a larger rectangular window on the ground floor. The central part of the building has a prominent entrance on the ground floor with a white door and a small arched pediment. Above the entrance, there are two tall, narrow windows on the second floor, each with a decorative arched lintel. To the right of these, there are three more arched openings on the second floor, but they do not contain windows. The roofline is punctuated by two chimneys and a small dormer window with three panes. The drawing uses fine lines to represent brickwork and shading to indicate depth and light.

This architectural elevation depicts a three-story red brick building with a mansard roof. The roof is covered in reddish-brown tiles and features three dormer windows, each containing three small, light blue rectangular panes. The main facade is constructed of red brick and is punctuated by two rows of windows. The second floor has eight arched windows with white frames and light blue panes, each topped with a decorative black wrought-iron balcony. The first floor features seven tall, rectangular, double-hung windows with white frames and light blue panes, and a single, smaller rectangular window on the far right. The building is flanked by two vertical red brick chimneys. A small red structure is visible at the bottom right corner.
